

EASY ACCESS CO.  
LADDERS/WORK PLATFORMS,  
TRESTLES & PLANKS

# LADDERS

For compliant use on a trade site, the minimum recommended weight rating for a ladder is 150kg, and the ladder must display an "Industrial" label. Easy Access Trade Series aluminium and fibreglass trade ladders are 150kg rated, and include an extensive range of ladder types to suit the job.

For a more robust ladder choice, the New Zealand-made Warthog range is rated to 180Kg and are sold with a 10 year warranty.

For household use and light industrial tasks, we have a handy domestic 120Kg rated ladder range.

**New Zealand's  
widest range  
of **LADDERS****

# ONSITE LADDER USE

## FAQs AND REGULATORY SAFETY GUIDELINES

### INDUSTRIAL LABEL FOR TRADE SITES

Ladders must have an "Industrial" label to be compliant for trade sites. A minimum weight rating of 150kg is recommended for trade.

### SAFE ANGLE OF SLOPE

The ratio of height to horizontal distance out from the vertical support surface of any single pole or extension ladder is from 1:4 to 1:6.

### LADDER USE DURATION

Ladders are to be used only for tasks of short duration which would normally be less than 10 minutes.

### PLATFORM LADDERS ARE PREFERABLE

Platform ladders are recommended for tasks more than 5 mins because they provide 3 points of contact, a stable working platform and a handrail.

### LADDERS ON TRADE SITES

Platform ladders are the only ladder type permissible on many worksites.

### FOLD-OUT STEP/EXTENSION LADDERS

Look for trapezoidal steps on dual purpose ladders for a comfortable step in both step and single ladder positions.

### LADDER COMPLIANCE

The standard of compliance for portable ladders is AS/NZS 1892.

NB. Worksite requirements may vary, and may be more stringent than the legal requirement.

# 180KG DUAL PURPOSE WARTHOG WELDED LADDER

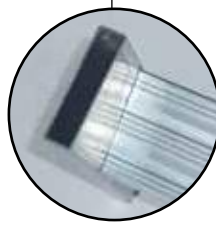

## FULLY WELDED - THE STRONGEST LADDER FOR THE SERIOUS TRADESMAN

- Dual purpose, fold out ladder
- No protruding hooks or snag points to catch on roof racks and get damaged
- All rungs line up to form a large flat step when folded
- Same size rungs right to the top
- Will not twist - exceptional torsional strength

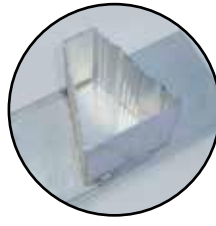

IDEAL FOR TRADE USE  
LOAD RATED AT 180KG

BOX SECTION STILES ALMOST DOUBLE THE TORSIONAL TWIST STRENGTH OF C-SHAPED CHANNEL SECTIONS - NO NEED FOR GUSSET BRACING

WELDED TRAPEZOIDAL STEPS. THESE WILL NEVER LOOSEN WITH WEAR AND TEAR AS SWAGED OR RIVETED STEPS DO OVER TIME. THIS FEATURE PROMISES THE OPERATOR YEARS OF RELIABLE AND SAFE USE

## TRADE SERIES TELESCOPIC PLATFORM LADDER

### FEATURES & BENEFITS

- Height adjustable for working off a large safe platform at 4 variable heights
- Platform heights adjustable from 4-step (1.2m) to 7-step (2.0m) in seconds
- Set front and back stiles to varying heights for working on steps or uneven ground
- Handrail allows for 3 points of contact
- Large rubber feet for stable grip and hard wearing
- Rated to 150kg for industrial applications
- One-piece, smooth operation – simply folds flat and locks
- Can be fitted with accessories – tool bucket and full surround handrail

### KEY COMPONENTS

Code	Description
